COLLINS OMONDI

Full-Stack Web Developer

+254 796 307 877 • collinsomondi778@gmail.com • Nairobi, Kenya

PROFESSIONAL SUMMARY

Full-stack Web Developer with 3+ years of experience building and maintaining web applications spanning PHP (Symfony) backend services, Java-based microservices, and modern JavaScript front ends (React.js, Vue.js, Next.js). Skilled in designing and consuming RESTful APIs, working with MySQL/PostgreSQL databases, and delivering clean, testable, well-documented code within collaborative Agile teams. Comfortable across the stack, with a track record of debugging production issues methodically and improving performance, security, and reliability of existing systems.

TECHNICAL SKILLS

Backend: PHP (Symfony), Node.js/Express, Java (microservices), RESTful API design & integration

Frontend: React.js, Next.js, Vue.js (Vue 2/3, Composition API), Nuxt.js, JavaScript (ES6+), TypeScript, HTML5, CSS3

Databases: MySQL, PostgreSQL

State Management: Redux Toolkit, Context API, Zustand, Pinia

Styling: Tailwind CSS, Bootstrap, Material UI, Vuetify, Responsive Design

Tools & Practices: Git/GitHub, CI/CD, Webpack, Vite, Object-Oriented Programming

Testing: Jest, Vitest, Cypress, React Testing Library, Playwright

AI Dev Tools: Claude, ChatGPT, Cursor (integrated into daily development workflow)

PROFESSIONAL EXPERIENCE

Software Developer | TalkRemit *07/2024 – 05/2026*

- Worked across the stack on fintech products, contributing to backend services built with Symfony (PHP) and collaborating with backend engineers on RESTful APIs that connected front-end applications to Java-based microservices.
- Built and maintained reusable React.js and Next.js component libraries, translating Figma designs into production-ready code and accelerating design-to-development handoff.
- Integrated RESTful APIs and third-party financial services, ensuring secure, seamless client-server communication across core products.
- Improved application load times through code splitting, lazy loading, and asset optimisation, driving measurable gains in Core Web Vitals scores.
- Enforced security standards (XSS/CSRF protection, input validation, secure token handling) across the stack, ensuring compliance with financial industry regulations.
- Participated in code reviews and bi-weekly Agile sprints, giving and receiving direct feedback and maintaining consistent coding standards across the team.

Software Developer | Grow Mobile Technology *02/2024 – 11/2024*

- Developed full-stack web applications, building modular React and Vue.js front-end components alongside backend/API logic to support product features end to end.

- Designed and integrated RESTful APIs in close collaboration with backend teams, reducing latency and improving responsiveness across Agile sprints.
- Optimised performance through lazy loading, code splitting, and Vue Router dynamic imports, delivering significantly faster load times.

Frontend Engineer | Binary Pay *04/2022 – 10/2023*

- Developed mobile-first UIs with Next.js and TypeScript, ensuring responsive design compliance and driving strong engagement across payment products.
- Streamlined state management using Redux Toolkit for complex payment workflows, reducing runtime errors and improving application reliability.
- Wrote Cypress integration tests for API-connected components, contributing to near-perfect uptime for critical payment flows.
- Translated Figma prototypes into pixel-accurate code and built a Nuxt.js dashboard for payment processing, supporting mobile-first delivery.

Associate Software Developer | Cloud Apex Solutions *02/2021 – 02/2022*

- Created reusable React components with Tailwind CSS following DRY principles, reducing development time and improving consistency across projects.
- Contributed to Node.js middleware for authentication, enhancing API security and overall system reliability.

EDUCATION

Bachelor of Science — Information Technology | Mount Kenya University

CERTIFICATIONS & TRAINING

Frontend Developer Training Program | Azubi Africa, Nairobi *12/2022 – 09/2023*

- Intensive hands-on program covering React.js, API integration, and responsive web design; built production-ready applications including a Dictionary Web App, Country Information Portal, and GitHub Profile Explorer.

VOLUNTEERING & LEADERSHIP

Technical Mentor — Web Technologies | Google Developer Student Clubs *09/2021 – 08/2022*

- Mentored club members in React and web fundamentals through one-on-one sessions and group workshops; facilitated real-world project delivery.
